

# Start-up & Relocation Services

ECI offers a complete suite of implementation and design services to create a highly secure and efficient office infrastructure. As a single source of contact, we can help prevent planning errors that can delay your move and, or increase construction fees. A project manager and team will be assigned to work with your architect and all of your third-party vendors and contractors to ensure that your project completes on time and on budget. ECI's solutions are always turnkey. Not only do we manage project planning and design, we conduct the physical installation of all equipment and software. We ensure your business is fully operational from day one.
