

Eze Castle Integration: Global Hedge Fund Cloud Services Provider of the Year

Eze Castle Integration is a trusted global provider of managed IT, cloud and cybersecurity services to the alternative investment industry. The firm's Executive Director, Dean Hill takes time to provide us with a detailed overview of the innovative firm.

Eze Castle Integration is a trusted global provider of managed IT, cloud and cybersecurity services to the alternative investment industry - spanning hedge funds, private equity and wealth management firms. Supporting over 650 clients around the world, we pride ourselves in delivering localised IT solutions on a global scale.

Being at the forefront of technology and innovation is our mission. We take time to research, review and test new technologies and emerging trends, before adopting these into our service offering. The evolution of our cloud services platform is a prime example of this. It all began in 2005, when Eze Castle Integration deployed the first hosted cloud platform for a single hedge fund based in New York City. Today, we're the cloud services provider of choice, supporting thousands of investment industry professionals around the globe with multi-cloud capabilities, and running over 100 financial and trading applications.

Our cloud services include the Eze Private Cloud and the Eze Hybrid Cloud. The Eze Private Cloud is a premier enterprise-grade, private cloud infrastructure that provides firms with a highly redundant, secure and scalable IT environment. It spans three continents, supports thousands of users and is fully managed by Eze Castle Integration. The Eze Hybrid Cloud combines our premier private cloud, with Microsoft Cloud services to deliver a secure and flexible environment for investment firms seeking multi-cloud capabilities. Our hybrid cloud is built with direct connectivity to other platforms across the financial industry, including pre- and post-trade counterparties and trading networks.

We believe that company culture plays a significant role in delivering exceptional client service. To

maintain a strong and focused company culture, we invest in full-time employees in all our offices across Asia, Europe and the United States. Each of our employees go through a rigorous onboarding programme and receive continuous training - relevant to their role, to ensure that we stay abreast of the ever-evolving technology landscape.

During our 23-year tenure, we've seen regulatory changes driving the need for new technology adoption on an annual basis. We overcome such challenges with ongoing investment of time and money into research and development, to provide clients with future-proof and ever-compliant IT services. At Eze Castle Integration, we strive to hit the highest levels of regulatory compliance globally, no matter which geographic region is driving the demand. By doing so, we are always ahead of the compliance curve and well-equipped to support any of our clients' needs.

Eze Castle Integration is proud to have a flat organisational structure. Employees on all levels, including our senior management team are involved in day-to-day business operations. Together, our senior management team has over 200 years of global experience in supporting the IT and technology needs of the alternative investment industry. This experience has been instrumental in making strategic business decisions to shape the direction of the company, in line with the needs of our clients. A combination of these organisational factors is what we believe has enabled Eze Castle Integration to establish and maintain the position of a trusted IT partner.

As a global cloud services provider, Eze Castle Integration is proud to be able to support large-scale

"This award testifies Eze Castle Integration's ongoing commitment and unrivalled dedication to delivering best in class cloud services"

firms on varying levels, whilst also helping start-up investment firms bring down their cost to entry. In the near future, we aim to extend our services to provide tailored technology and operational support to other verticals in the broader financial services landscape.

This award testifies Eze Castle Integration's ongoing commitment and unrivalled dedication to delivering best in class cloud services, to hedge funds and alternative investment firms. Last year, we received 15 industry awards recognising a range of our technology services from cloud, to IT consultancy and cybersecurity. Awards like these reinforce our mission, motivating Eze Castle Integration to work harder to meet the IT needs of firms around the world.
